OFFICIAL PAPER FOR
CITY OF ALBUQUERQUE

NEW YORK'S MANY
AMUSING FEATURES

Dr. Clark, Eminent Teacher,
Is Toasted by 6,000
Pupils.

SOCIETY AND THE STAGE

Safford's Heart Infringed on His
Lungs--New York's Spring
Is Tardy.

New York, April 6.—An interesting dinner was given at the Waldorf Astoria last Monday night to Dr. George W. Clark, who on that day celebrated his ninetieth birthday. The dinner was given to the famous schoolmaster by some of his boys, of whom there were 6,000, all of whom went to the Mount Washington Collegiate institution, the building of which still stands at 49 Washington Square, from 1845 to 1880 he trained the minds of many youths who afterward became famous.

Among this number may be counted Rescoe Conkling, who gave his teacher great trouble. Dr. Clark had just begun to teach when Judge Conkling brought his son to school. Up to that time the young prodigy had determined that moral suasion and not physical force was the proper method in teaching the young idea to sprout. When young Conkling became accustomed to his surroundings he started in on a campaign for trouble, and found it. His defiant demeanor decided his teacher to abandon the moral suasion theory and get out a stout cane. "He became one of the best students," says Dr. Clark, "as he was ever after one of my warmest friends. He always made him a United States senator—and, strange as it may seem, I had the honor as a member of the legislature in 1873 of voting for him for a second term in the highest legislative body in the world."

An unusually interesting wedding ceremony is scheduled for tonight at the annual bazaar in Schuetzen park, given by "The Haymakers." As a novelty for this year's outing, this unique organization has determined to have a public wedding. The directors announced some time since that any couple who would consent to stand up before a crowd of strangers and get married, and after the ceremony lead the march in the bazaar dance, would be presented with enough furniture to set up housekeeping and the full expenses of their honeymoon trip.

It is said that eighteen young men went privately to say they were willing, but the girl in each case was too bashful. Twenty-one young women, declare the directors, also came around to discuss the matter. They announced they were willing and if their happy lovers were not so dreadfully shy they'd get to get married that way without the usual expense of a wedding.

The situation began to look gloomy. The directors tried to match up one of the willing girls with one of the willing men, but there was absolutely nothing doing. Finally a couple came forward and declared themselves willing to undergo the ceremony. The directors gave satisfactory assurances that they meant business and would not back out, but stipulated that the ceremony be kept secret until the very moment of the ceremony. A justice of the peace will perform the ceremony tonight, and the Haymakers are preparing to celebrate the ceremony in a proper and fitting manner.

An autopsy at the morgue the other day disclosed the largest human heart in medical records. It was found in the body of Bainbridge C. Stafford, who died in the Tombs, where he was lodged, charged with burglary by force and conspiracy to defraud, and was held by the Baltimore, Md., who alleged hypochondria of stock valued at \$1,000.

The autopsy was performed by Professor John C. Larkin, of the College of Physicians and Surgeons. Stafford's heart was found to weigh four pounds and two ounces. Twelve to fourteen ounces is the weight of the normal heart. Almost every bit of space which should normally be occupied by the lung, which was shriveled up, had been inflated by the heart, and the physicians declared that it was marvelous Stafford lived as long as he did with his heart in such a condition.

A New Yorker, just returned from London, says King Edward has added to his menage at Buckingham palace an expert concocter of cocktails and other seductive American drinks. This imported mixer is a genuine article in his line, says the New Yorker, who, to use his own phrase, has "sampled the goods." The king himself does not dare to imbibe these strenuous drinks to which he was first introduced on the occasion of his trip to America long ago. The pleasure of this particular form of good cheer can therefore be nothing but a memory to him. The innovation, says the New Yorker, has merely to strengthen the bonds of amity between America and the mother country. The king will leave nothing undone to cement the international friendship.

The quick transition from spring to winter last Sunday spewed a considerable number of colds and winter week house parties. At Rhinebeck, Staatsburg, Barrytown, and other fashionable colonies along the Hudson, elaborate entertainments had been planned for guests invited. The raw, rainy day spoiled the outing and drove guests who had expected to stay at least half a week, back to the steam heated houses and restaurants of New York. Tuxedo, which had rapidly assumed its spring appearance, was thronged with fashionable society on Saturday night and for Easter Sunday. The sudden cold sent most of them scurrying back to town, where they were turned to compare notes with the married guests from the country estates in Sussex and Suffolk counties, and other points where society is wont to gather during the first few days of spring.

Society recovered with a rush from the dull days of Holy Week. On Monday evening Mrs. Auguste Heckscher's cotillion at the St. Regis for her daughter, Miss Antoinette

Heckscher, was well attended by the younger set. On Wednesday night Mrs. Charles Wall gave a small dance, also at the St. Regis, for her granddaughter, Miss Elsie Ladew, and her young friends. Mrs. E. Henry Harriman gave a small dance at her home on Friday night and at Sherry's. Mr. George T. Brokaw gave a supper and an informal dance. There were a number of dancing class meetings during the week, but no elaborate balls. On April 13, Mrs. Henry Curtis Emmet will give what will probably prove the last dance of the season at the St. Regis. On Monday night Frederick R. Childs, whose marriage to Miss Constance Lator Crimmins, daughter of John D. Crimmins, occurred Wednesday, gave his farewell bachelor dinner at Delmonico's.

Ermene Novelli's change of repertoire for the past week presented the distinguished actor and his capable supporting company in three serious plays and four comedies. The list included "Kean," by Dumas, the elder, familiar to American playgoers in the Charles Coghlan version of "The Royal Box," a repetition of "Papa Leonhard," the play in which he opened his New York engagement, and a repetition of "Louis XI," the balance of the week was devoted to farce and comedy. The first of these was Henry J. Byron's old comedy, "Our Boys," translated of course into Italian. The second was "The Rape of the Sabine," which is the Italian name of "A Night Off," in which James Lewis, Mrs. Gilbert and Henry E. Dixey were the New York favorites. Novelli appeared as a barnstormer, the role acted by Dixey. The third play known in Italian by the name of "A Wife is Not a Fish," is really a Spanish play by Robert Bernard and Valabreux. The fourth comedy was "A Curious Accident," by Carlo Goldoni, the Italian Moliere.

A new play which attracted most of the critics on Monday night, was J. Hartley Manners' comedy, "A Marriage of Reason," in which Kyle Bellew and Fanny Ward appeared in the leading roles. The comedy started off well, but the last two acts proved decidedly weak, and the consensus of opinion spells failure for this dramatization of Mrs. Arthur Kennard's novel, "The Second Lady Delmonico." Other new attractions were "The Ambitious Mrs. Alcott," dealing with life in the diplomatic circles of Washington; Ethel Barrymore's revival of "His Excellency the Governor," and "The Lilac Room," a new play with Amelia Bingham as the star.

"Pneumonia's Deadly Work" had so seriously affected the right lung, writes Mrs. Fannie Connor, of Rural Route 1, Georgetown, Tenn., "that I coughed continuously night and day and the neighbors' prediction—consumption—seemed inevitable, until my husband brought home a bottle of Dr. King's New Discovery, which in my case proved to be the only real cure and restorer of weak, sore lungs." When all other remedies utterly fail, you may still win in a battle against lung and throat troubles with New Discovery, the real cure. Guaranteed by all druggists. 50c and \$1.00. Trial bottle free.

BRICK MANUFACTURING
COMPANY FOR
ROSWELL

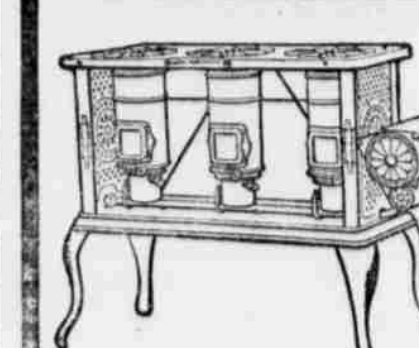

Town of Urton is Changed to
Kenna: Notaries Public
Appointed.

The following articles of incorporation have been filed in the office of Territorial Secretary J. W. Reynolds, at Santa Fe: The Brick Manufacturing and Construction company. Principal place of business at Roswell, Chaves county. Territorial agent, G. A. Richards, at Roswell. Capital stock, \$50,000, divided into 500 shares of the par value of \$100 each. Object, manufacture of brick and cement roofing tile; also general contracting work. Duration, forty years. Incorporators, Charles W. Jones, G. A. Richardson, Charles H. Jones and Howard M. Jones, all of Roswell.

Notaries Public Appointed.
The following have been appointed notaries public by Governor Hagerman: Martin L. Moody, of Elida, Roosevelt county; John C. Roberts, of Mountain Park, Otero county; James A. Taylor, of Texico, Roosevelt county; Benjamin J. Viljoen, of Chamberlain, Dona Ana county; Blas Sanchez, of Roy, Mora county; Thomas W. Youngblood, of Elida, Roosevelt county.

Name of Town Changed.
According to a special dispatch from Washington, the postoffice authorities have changed the name of the town of Urton, Chaves county, and it will hereafter be known as Kenna.

A Wonderful Oil Stove

Entirely different
from all others. Embodies new ideas, new principles. Easily managed. Reduces fuel expense. Ready for business at moment of lighting. For your summer cooking get a

NEW PERFECTION
Wick Blue Flame Oil Cook-Stove

Its heat is highly concentrated. Does not overheat the kitchen. Oil always at a maintained level. Three sizes. Fully warranted. If not at your dealer's, write our nearest agency for descriptive circular.

THE Rayo Lamp is the best round household use. Made of brass throughout and beautifully nickel-plated. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's, write to our nearest agency.

SECRETS OF THE
RAILROAD TRUSTS

The Why of the Recent
Panic on Wall
Street.

FREIGHT SLOW AS BULLOCKS

Money Managers Crippled Roads
for Private Gain--Situation
Tightening.

Special Correspondence.
New York, April 6.—Some interesting information has just come to light regarding the affairs of the Hill railroad which shows better than anything else the real trouble underlying the entire railroad situation in the United States. As the condition of the Northern Pacific, Great Northern and Burlington roads in typical of nearly all the railroad properties of the United States, especially those west of the Mississippi river, the real cause of the great shrinkage in railroad and industrial values in Wall Street at last is apparent.

Five years ago, James J. Hill and others in control of the Northern Pacific, Great Northern and Burlington management were confronted with the problem of handling their transportation traffic. They saw the urgent necessity of double tracking their lines from St. Paul to Seattle. It then would have cost \$50,000,000 to have done their work and to have perfected the system. Money rates were easy, and a loan could have been negotiated without any trouble. Also, the roads had comfortable surpluses of their own that could have been used for permanent improvements and betterments.

Instead of following this wise course, Mr. Hill and his associates did exactly the thing that the management of other railroads were doing and which they continued to do until a very few months ago. They deflected double-tracking their system for an indefinite period and devoted their entire energies to dressing up finances, Wall Street manipulation. They paid large dividends, made one move after another for their own private benefits, and advanced the stock on the exchange to the highest possible price. "The Lilac Room," a new play with Amelia Bingham as the star.

As time went on, the need for double tracking the system became greater; traffic was congested and the situation grew more desperate. Then came the tightening of money rates, the awakening of public distrust in railroad management and the general reaction in the stock market. The result was that the roads were unable to borrow money on reasonable terms and then the double tracking had to wait.

The results are appalling. Today it takes four months, or 120 days, to move a carload of freight from Duluth or St. Paul to Seattle, although the distance is but 2,500 miles. This is at the rate, approximately, of twenty miles a day, which schedule can be maintained by a bullock team. At points on the Cascade division, Northern Pacific trains are moving no better than three miles a day, while at other points on the system four miles a day is about the average.

Freight Blocked.
Five thousand carloads of freight today are blocked in transit because the Hill roads are single tracked. The average freight bill on each delayed car is \$500, and with 50,000 cars held up indefinitely, \$25,000,000 in freight bills belonging to the Hill roads is tied up. This amount about equals the combined surplus of the lines. To carry \$25,000,000 in bills receivable requires an enormous working capital. Thus handicapped, the Hill roads have to resort to every possible expedient to secure ready cash. The interest that is paid up through the necessity of carrying this \$25,000,000 in freight charges is enormous and eats heavily into the profits.

Notes of all sorts, and at various rates of interest, have been turned over to the United States Steel corporation to meet current bills, and the United States Steel corporation has been compelled, within the last six months, to take like notes from nearly every other railroad corporation in the United States. The railroad is willing to turn over any kind of paper, on any sort of terms, provided they be not called upon for cash.

A result is that the big surplus of the United States Steel corporation now is made up almost entirely of railroad notes, and the day is coming fast when the big steel trust will have to enter the money market as a borrower, in order to meet its ordinary business needs. Then, when its own condition becomes known, a further panic will hit the securities markets.

Of course, these facts have been known to a few leading bankers and financiers for months; hence their action in unloading stocks. But the facts have been kept scrupulously secret at the public as long as possible, while the railroad men and financiers have been hoping against hope that something would happen to relieve the trouble.

Now they are face to face with the results of their own mismanagement. With federal and state administration, and the public carefully scrutinizing every step of railroad management, these frenzied railroaders and financiers are bound to feel the dire consequences of their past manipulations.

Rock Under Manhattan.
An elaborate exhibit, showing the character and formation of the great bed of rock known as Manhattan Island, is being shown at the Museum of Natural History under the supervision of Dr. E. O. Hovey, who is in charge of the geological department. The exhibit is a model taken from deep excavations, specimens already obtained show the formation of the island at a depth of 350 feet, and, within a short time, twice this depth will be shown.

Specimens obtained, so far, from a depth of 350 feet, have been secured from sections of the island lying between Liberty street on the south and Seventy-fourth street on the north. While specimens from a depth of from 60 to 160 feet were obtained readily from excavations for big buildings, it was impossible to get a long time to find out the rock formation at a greater depth. The invention of the plunger type of elevator removed the difficulty.

Elevators of this type now are being used generally in the new skyscrapers. The car is raised by a huge beam, usually ten inches or a foot in diameter. The beam is suspended from the bottom of its shaft the raising beam is sheathed in a straight bore which goes down into the earth at a distance equal to the height of the building. If the car has to travel 300 feet to the basement to the top floor, then the raising beam must run 300 feet into the earth below the building, and the machinery that raises the beam.

Specimens from a depth of 350 feet were obtained from the ground on which the big Madison apartment house was built, but specimens from a depth of 650 feet will be obtained in a short time from beneath the Singer building, which is being constructed in lower Broadway. The borings for these plunger elevators are made out in solid, cylindrical pieces of rock ten to fifteen feet long.

prevent the owner of a building from covering the outside of his structure, as well as the roof, with matter of this description. The result is apparent to everybody who walks Broadway from Twenty-third to Forty-second street any day.

"Salome" Again.
Although the owners of the Metropolitan opera house, compelled Director Conrad to abandon the production of "Salome" during the recent season, the opera will be produced in this city and elsewhere in the fall for four weeks preparatory to the opening of the Metropolitan season in November.

During this period, twenty productions of the opera are planned by Conrad, ten in New York and ten in other cities including Philadelphia, Boston and probably Washington, Baltimore and Chicago. For this "Salome" season an especially large orchestra is being engaged and a company is selected out of the regular Metropolitan company. The cast is arranged so there will be two acts of principles.

If Mr. Conrad cannot use the Metropolitan opera house for his ten local performances, he will utilize one of the largest of the regular theatres, which is at his disposal.

COBBLER INVENTS NEW FUEL
MOST REMARKABLE
DISCOVERY

WHILE PEGGING AWAY AT HIS
LAST, JOHN ELLMORE PER-
FECTS IDEA GIVEN TO HIM BY
FATHER.

Special Correspondence.
Blooms, Pa., April 6.—John Ellmore, a cobbler, expects to revolutionize all the industries that depend upon coal for fuel. He has invented a chemical compound, which looks like a coarse reddish sand. Four tons of ashes, one ton of coal and several pounds of the chemical compound will produce more heat than ten tons of coal, produce more heat than ten tons of coal, produce more heat than ten tons of coal.

Complicated by the authorities on finance in America, and issued in the interests of our clients. All the news gathered by wire on the publication. Gives you the news of Goldfield five days ahead of the newspapers. Gives the situation of the big financial centers ahead of the newspapers. Broke up over the country way to learn his market views. All investors should read it and know the truth. Write today for a Free Copy.

Doing Business Again.
"When my friends thought I was about to take leave of this world, on account of indigestion, nervousness and general debility," writes A. A. Chisholm, Treadwell, N. Y., and when I looked as if I had been left, I was persuaded to try Electric Bitters, and I rejoice to say that they are curing me. I am now doing business again as of old and still gaining daily." Best tonic medicine on earth. Guaranteed by all druggists. 50c.

PROPOSALS FOR TWO ADOBE
BUILDINGS. Department of the Interior, Office of Indian Affairs, Washington, D. C., March 19, 1937. SEALED PROPOSALS, plainly marked on the outside of the envelope "Proposals for Day School Buildings, Santa Fe, New Mexico," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until two o'clock p. m. of April 18, 1937, for furnishing and delivering the necessary materials and labor required to construct and complete a day school building and employees' quarters both of adobe at the San Ildefonso day school, New Mexico, in strict accordance with plans and specifications and instructions to bidders which may be examined at this office, the offices of "The Citizen," Albuquerque, N. M., and the "New Mexican," Santa Fe, N. M.; the Builders and Traders' Exchange at Omaha, Neb.; St. Paul, Minn.; and Minneapolis, Minn.; Northwestern Manufacturers' Association, St. Paul, Minn.; the Hawaiian Industries at Chicago, Ill.; St. Louis, Mo.; Omaha, Neb.; and New York, N. Y.; and with Clinton J. Crandall, Supt. Indian School, Santa Fe, N. M., to whom application should be made for further information. C. F. LARABEE, Acting Commissioner.

Does coffee disagree with you? Probably it does! Then try Dr. Shoop's Health Coffee. "Health Coffee" is a clever combination of parched cereals and nuts. Not a grain of real coffee, therefore, in Dr. Shoop's Health Coffee, yet its flavor and taste matches closely old Java and Mocha coffee. If your stomach, heart, or kidneys can't stand coffee drinking, try Health Coffee. It is wholesome, nourishing and satisfying. It's sold even for the youngest child. Sold by C. N. Brimham.

at Work at his "Last."

ducing no smoke, and the ashes can be used over again, until reduced to cinder. Tests indicate that the discovery is one of the most remarkable of the age.

The compound is easily soluble in water, and when thrown upon ashes in a furnace a glowing mass is formed, with apparently the consistency of jelly, but producing an intense heat.

Ellmore is 57 years old, and evolved the idea of the new fuel while pegging away in his cobbler shop, where he has been making from \$10 to \$12 a week.

"I worked on this thing for years," said Mr. Ellmore. "The idea was suggested to me by my father years ago, and during all these years I have been adding detail by detail. I am not a chemist, of course."

"Yes, I am watching and guarding my invention so that no one can steal it from me. I have no money myself to start the manufacture of the fuel, but certain men of money are looking into the matter. I have fully protected myself."

CLASSIFIED ADVERTISEMENTS

WANTED.—At once, one short order cook. Apply to P. W. Yunker, Socorro, N. M.

WANTED.—Salesman and collector. Good proposition for right man. 2125 South Second street.

WANTED.—A girl for general house work, small family. Mrs. Arnold, 724 West Copper avenue.

WANTED.—More work for a first-class hand laundry. Lace curtains a specialty. Satisfaction guaranteed. 408 West Tulara avenue, Colorado Springs, Colo. Phone 344.

WANTED.—Ladies wanting stylish millinery and dressmaking, call on Miss Crane, 512 North Second street. Prices low. Also appointments waiting.

WANTED.—Gentlemen's second-hand clothing. No. 515 South First street, south of viaduct. Send address and will call. R. J. Sweeney, proprietor.

SALESMAN WANTED.
WANTED.—A high class specialty salesman of experience for New Mexico, who can command at least \$2,000 per year above expenses. Permanent position, to right man. J. A. Kidwell, Mgr. Sales Dept., Cleveland, Ohio.

WANTED.—Large wholesale house, paying its salesman \$1500 per year plus expenses to sell staple line to general trade desires two more men to commence work at once, if possible. Address Sawyer, Leslie & Co., Detroit, Mich.

WANTED.—Capable salesman to cover New Mexico with staple line, high commission with \$100 monthly advance. Permanent position to right man. Jess H. Smith Co., Detroit, Michigan.

FOR RENT.—Furnished rooms and tent, 413 South Broadway.

FOR RENT.—Pleasant well-furnished rooms, near business center; rates reasonable. Corner Sixth and Railroad. Apply at rear.

FOR SALE.—Tent house, furnished. 14x16, 1109 East Railroad avenue.

FOR SALE.—A good big cow, will be fresh soon. See George K. Neher.

FOR SALE.—Party will sacrifice typewriter, as new. Address typewriter, care of Citizen office.

FOR SALE.—A 14x16 tent house, cheap. Inquire 724 East Grand avenue.

FOR SALE.—Thoroughbred Jersey bull, coming four. Address or inquire of J. C. Remondet, 6 miles south of Albuquerque.

FOR SALE.—At the "Variety" you will find fine home made bread, 5c a loaf; doughnuts, pies baked fresh, and other things strictly home made. Phone 710. Mrs. Downs, 506 South Armo St.

FREE MONEY MAP OF NEVADA
Investor in Nevada mines should have our Money Map. Those who are not investors should get it and learn of the Land Where Fortunes Are Made in the Making in mines that are waiting in the trail of wealth.

Our maps are compiled from government surveys and other official data, supplemented by the work of our engineers, gives the exact location and production of every mine, and shows all the railroads, including those under construction, surveyed or proposed.
